For over 40 years TCC Printing has

**TCC Printing
& Imaging is**

an environmentally

proactive company using

the latest in technology to

contribute to a clean and healthy
environment for future generations.

For several years we have been

using Computer-To-Plate technology

eliminating the use of film, developer,

fixer and large amounts of hot water. We

print with soy and vegetable based inks

which have zero VOC's and use only low

VOC solvents for clean up. Cloth wipers are

used for press cleaning, then laundered at a

local company where waste is turned into an

inert by-product for legal disposal. Left-over

inks are stored in our ink library for reuse. Inks

not suitable for reuse are recycled at a federally

controlled recycler who turns the spent ink and

solvents into fuel. All of our lighting throughout

the shop has been replaced with high efficiency

tubes reducing energy consumption. For over

forty years we have recycled all our paper and

cardboard wastes along with aluminum plates; all

production and office toners and ink cartridges are

also recycled. Outdated computers, monitors, and

equipment are recycled by licensed companies.

Often these recyclers are non-profits who donate

their proceeds to charitable organizations. TCC is

an environmentally friendly company, committed

to doing everything in our power to **reduce, reuse**

and recycle.

been an environmentally
proactive company.
